The first starry sky  
of its kind in Japan

# The Konica Minolta Planetarium

This facility is directly managed by Konica Minolta Planetarium Co., Inc., a manufacturer of planetarium equipment. Stop by after work to enjoy a star-filled sky, choose the spot for a romantic date, come to heal your tired soul or for a refreshing change of pace. No matter what your aim, you'll be amazed to feel yourself immersed in stars and other cosmic images. Here you'll find a planetarium experience available only with Konica Minolta Planetarium state-of-the-art technology.

## Gaze at a premium starry sky from Aurora seats.

Right at the front of the dome are four premium seats named after the northern lights that change color and shape from moment to moment. Each of the Aurora seats has a different patterned upholstery. Stretch your legs out, lie back and watch the night sky spread out above, and feel yourself wrapped in the stars. Enjoy the luxurious comfort and soul-healing effects of the luxurious Aurora seats.

Here, in the first LED domed planetarium in Japan, a supremely beautiful virtual experience.

### LED dome system DYNAVISION®-LED

Most planetariums use projectors to show their programs. At Manten Nagoya, it's a completely different story. The dome is covered in LED featuring high brightness and the ultimate in range of color. Never before has such a realistic and utterly captivating experience been possible.

A deep blue sky, the splendid colors of a coral reef, and a stirring red sunset. All lead to the Milky Way in the night sky. It's a beautiful world portrayed by DYNAVISION®-LED, one where facts and fiction intertwine. Enjoy a short trip here at Manten Nagoya. We'll take you to towns in faraway countries, to the bottom of the sea, and to the edges of the cosmos.

Visit our official website for information on current shows and to purchase tickets.

A mysterious gift shop somewhere in the galaxy

## GALLERY PLANETARIA

You might like some shiny stardust from a distant star, a little piece of the cosmos, or some other fantastical items we have here. Instead of giving that special someone a bouquet of flowers, why not choose a gift from the starry sky? \*The gift shop is open to non-ticketholders.

To commemorate the opening coffee mugs produced exclusively for Manten Nagoya by Noritake (on sale from winter 2021)
